New Doctor Cacioppo

I thank you very much for sending me the new CD with your fascinating music.

I have really enjoyed it, and I think that in your works one can feel a profound reflection and elaboration of impression and themes which are also rooted in your Italian heritage that you have been able to explore and reshape through a personal contemporary perspective.

I hope that there will be the opportunities for you to collaborate in the future with our cultural network in the United States, in particular with our cultural institutes in New York and Washington and our General Consulate in Philadelphia, which is active also in the promotion of Italian cultural activities.

With my warmest regards

Giulio Terzi
